Purina® Calf Startena™

1021

DIRECTIONS

Feed this ration at a rate to provide 22.7 mg. decoquinate per 100 pounds of body weight (0.5 mg/kg) daily to cattle - as indicated in the table below.

Animal Weight	Feeding Rate Per Head/Day
100 lbs.	1.0 lbs.

Feed for at least 28 days during periods of coccidiosis or when experience indicates that coccidiosis is likely to be a hazard. Coccidiostats are not indicated for use in adult animals due to continuous previous exposure.

Follow these management practices:

1. Provide a source of fresh clean water at all times.
2. To insure freshness, offer only the amount of feed recommended.
3. Clean feeder pails daily.
4. Proper housing and sanitation are important to help prevent calf diarrhea and pneumonia. Consult your veterinarian for a planned herd health program.
5. When calves are housed in groups after weaning, provide adequate feeding space.

IMPORTANT

This product is to be fed only to the animal species as directed on this label.

CAUTION

Store in dry, well ventilated area protected from rodent and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness or death.

WARNING

DO NOT feed to cows producing milk for food.

This product was made in a feed manufacturing facility that does not handle or store products containing proteins prohibited in ruminant feed.

INGREDIENTS:

Grain Products, Plant Protein Products, Processed Grain By-Products, Suncured Alfalfa Meal, Roughage Products, Molasses Products, Vitamin A Supplement, Vitamin D Supplement, Vitamin E Supplement, Vitamin B12 Supplement, Riboflavin Supplement, Folic Acid, Biotin, Thiamine Mononitrate, Choline Chloride, Calcium Carbonate, Salt, Ferrous Sulfate, Yucca Schidigera Extract, Sodium Selenite, Copper Sulfate, Lactobacillus acidophilus Fermentation Product dehydrated, Lactobacillus casei Fermentation Product dehydrated, Bifidobacterium thermophilum Fermentation Product, Enterococcus faecium Fermentation Product dehydrated, Manganous Oxide, Magnesium Oxide, Zinc Oxide, Ethylenediamine Dihydride, Cobalt Carbonate, Potassium Chloride, Manganese Sulfate, Ferrous Carbonate, Copper Chloride, Zinc Sulfate, Calcium Iodate.

FEEDING DIRECTIONS: Does Just Kindling: Feed 2 to 3 OZ per doe the first day. Increase gradually by 1 OZ per doe day to free-choice feeding within 4 to 5 days.

Lactating Does: Feed free-choice.

Maternal Does: Feed 4 to 6 OZ per doe per day.

Weaned Bunnies: Feed free-choice.

Does/Bucks: Feed 4 to 6 OZ per head per day.

These pellets may be self-fed that is, kept before the animals at all times or hand-fed. Self-feeding is recommended for does and litters to help reduce labor and achieve rapid growth. Self-feeding is also recommended for weaned bunnies. If hand-feeding, the number of feedings per day is a matter of preference. It is important, though, to feed the animals the same number of times each day at approximately the same time. Monitor body condition and adjust feeding levels to maintain ideal body condition. It is not necessary to feed hay with NatureWise Rabbit Pellets 16. High quality hay may be fed, if desired. Hay must be fine-stemmed, leafy, green in color, well-cured and free from mildew or mold. Alfalfa, clover, sweet vernal, lespedeza, soybean and peanut hay are suitable. Cutting the hay into 3-4 inch lengths will help avoid waste. Provide fresh blocks or salt spoons and plenty of fresh, clean water at all times. Keep rabbit hutches, feeders and waterers clean. This product contains Yucca Schidigera Extract as an aid in the control of manure odor.

INGREDIENTS

Dehulled Soybean Meal, Steam Flaked Corn, Ground Corn, Steam Flaked Barley, Rolled Oats, Molasses, Distillers Dried Grain, Soybean Hulls, Calcium Carbonate, Ammonium Chloride, Salt, Monocalcium Phosphate, Dicalcium Phosphate, Calcium Sulfate, Sodium Bicarbonate, Magnesium Sulfate, Magnesium Oxide, Potassium Sulfate, Mineral Oil, Ferrous Sulfate, Manganous Sulfate, Zinc Sulfate, Vitamin A Acetate, dl-alpha-Tocopheryl (source of Vitamin E), Cobalt Carbonate, Ethylenediamine Dihydriodide (EDDI), Calcium Iodate, D-Activated Animal Sterol (source of Vitamin D3), Vegetable Oil, Sodium Selenite, Artificial Flavoring.

INSTRUCTIONS FOR FEEDING

Feed 1.00 to 4.66 pounds of Lamb Flex per head per day to provide 15 mg to 70 mg of Lasalocid. Always monitor consumption closely and provide fresh clean water at all times. Use only as directed. Excessive consumption may result in adverse toxic reaction. Contact your Cache Commodities feed representative for more complete directions on optimizing the growth of your lamb.

CAUTION

The safety of Lasalocid in unapproved species has not been established. Do not allow horses or other equines access to feeds containing Lasalocid, as ingestion may be fatal.

INGREDIENTS

Steam Flaked Corn, Beet Pulp Shreds, Steam Flaked Oats, Debulled Soybean Meal, Mechanical Extracted Soybean Meal, Hominy, Sorbean Hulls, Molasses Products, Cottonseed, Wheat Middlings, Cottonseed Hulls, Condensed Corn Fermentation Solubles, Vegetable Fat, Yeast Culture, Sodium Bicarbonate, Magnesium Limestone, Calcium Carbonate, Salt, Artificial Flavoring, Monocalcium Phosphate, Dicalcium Phosphate, Magnesium Oxide, Mineral Oil, Vitamin A Acetate, Iron Sulfate, Magnesium Sulfate, Thiamine Mononitrate, Zinc Sulfate, D-Activated Animal Sterol (source of vitamin D3), Zinc Proteinate, Copper Sulfate, Calcium Salts of Free Fatty Acids, Plant Charcoal, Sodium Alumino Silicate, dl-alpha-Tocopheryl (source of vitamin E), Sodium Selenite, Biotin, Kelp, Calcium Iodate, Cobalt Sulfate

INSTRUCTIONS FOR FEEDING

Each pound of feed contains 15mg Monensin. Do not exceed 32 lbs. per head per day. Limitation: Feed only to cattle being fed in confinement for slaughter. Feed continuously in complete feed at a rate of 50 -480 mg of Monensin per head per day. No additional improvement in feed efficiency has been shown from feeding Monensin at levels greater than 30 gm/ton (360 mg per head per day). To achieve 50 mg Monensin feed at least 3.34 lbs. of this feed.

CAUTION

Do not allow horses or other equines access to feed containing Monensin. Ingestion of Monensin by horses has been fatal. Monensin medicated cattle and goat feed is safe for use in cattle and goat only. Consumption by unapproved species may result in toxic reaction. Do not exceed the level recommended in the feeding directions, as reduced average daily gains may result. If feed refusals containing Monensin are fed to other groups of cattle the concentration of Monensin in the refusals and the amount of refusals fed should be taken into consideration to prevent Monensin overdosing.

WARNING

A withdrawal period has not been established for this product in per-ruminating calves. Do not use in calves to be processed for veal.

PURINA® EQUINE SENIOR®

352Q

DIRECTIONS

Daily Feeding Chart - Amount to be fed daily when no roughage is fed along with Equine Senior Horse Feed.

	Weight Of Horse (Lbs.)				
Lifestyle	600	800	1000	1200	1400
Maintenance	8.0	10.5	13.0	16.0	18.5
Light Work	10.0	13.0	16.5	19.5	23.0
Moderate Work	12.0	16.0	20.0	23.5	27.5
Lactating Broodmare	13.0	17.5	22.0	26.5	30.0
Breeding Stallion	10.0	13.0	16.5	19.5	23.0

- Feeding recommendations are based on average daily requirements for horses of different body weights. Actual feeding rates required to adequately maintain good condition of individual horses will be affected by individual metabolism and progression rate of aging processes. Therefore, feeding rates may need to be gradually adjusted in some horses according to body condition.

Feeding Equine Senior Horse Feed with forage—Good quality hay pasture may be fed along with Equine Senior Horse Feed. Make sure your horse is free of dental problems and can effectively chew and utilize forage. Reduce the amount of Equine Senior Horse Feed by 1.0 lb for each 1.5 - 2.0 lbs of hay consumed by your horse.

Do not feed less than 6.0 lbs of Equine Senior Horse Feed per day when with hay to meet minimum daily requirements of protein, vitamins & minerals.

IMPORTANT

1. Any feed changes should be made gradually over a period of 7 to 10 days. Changes in the rate of feeding should not exceed 1 pound per day for each horse. Feed at regular times - at least twice daily - three daily feedings preferred. Be sure to weigh your feed using a small scale. A small scale can be purchased in the fishing department at many sporting goods stores.
2. Reduce and/or delay feeding a horse which is hot, excited, showing pain, has fever or diarrhea. Consult your veterinarian if problems arise. Prevent rapid eating.
3. Let horses feed in a natural position from large feed containers.
4. Have plenty of fresh, clean water available at all times.
5. Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals - may cause illness or death.
6. Observe horses daily. Consult your veterinarian for preventive health care. Maintain a regular deworming and vaccination program.
7. Be sure that your horses are free of dental problems.
8. Feeding selenium resulting in total diet levels exceeding 0.3 ppm is prohibited.
