

— HI-ENERGY —
.30% PROTEIN TUB.
 — CONTROLLED CONSUMPTION TECHNOLOGY —

THE CONVENIENT CHOICE FOR WHAT YOUR CATTLE NEED

Purina® 30% Protein Hi-Energy Cattle Tubs are free choice supplements designed for beef cattle on medium to high quality forage diets (over 8% protein). The low moisture, cooked molasses products in non-returnable plastic containers will enhance intake and utilization of available forages, while potentially reducing labor for producers.

FEATURE	BENEFIT
Low Moisture Cooked Molasses Product Technology	Consistent intake and nutrient delivery that helps eliminate over consumption
Natural Protein (From Vegetable and Approved Animal Sources)	Supplies modest amounts of protein to optimize animal performance at an economical cost
Controlled NPN Delivery	NPN is beneficial to help rumen microbes maximize forage digestion. Purina® 30% Protein Hi-Energy Cattle tubs provide small amounts of NPN in a safe, controlled, predictable intake system
Positive Associative Effects When Fed With Low to Medium Quality Forages	Molasses provides readily-available energy to stimulate rumen fermentation that helps the animal extract more energy from the forage
Provides Optimum Levels of Trace Minerals at a 1 Pound Consumption Rate	Aids in reproductive performance and promotes fetal development
60 lb Non-Returnable Plastic Container	Labor saving supplement delivery system that aims to reduce the biosecurity risks associated with returnable containers
No Added Salt	Intake is not regulated by salt as in other supplements; using salt to regulate intake may result in consumption which can be unpredictable
Supplement Delivery Method That Fits a Variety of Production Systems	Convenient supplement delivery system is ideal for small beef producers with other time commitments, as well as large producers who experience time and labor shortages

Vitamin D ₃ min	10,000 IU/lb
Vitamin E min	50 IU/lb

See the Difference

Purina® 30% Protein High-Energy Cattle Tub supplement is the convenient choice for what your cows need.

- Provide additional supplements for pasture feeding programs
- Extend your forage and grass pastures
- Increased flexibility in your feeding program

Perfected at our LongView Animal Nutrition Center, because we share your passion for better cattle.

Great for Small Pastures

As your forages and grasses transition throughout the year, your cows' supplement needs increase to accommodate for these changes. And smaller pastures are more at risk of over-grazing. Over-grazing can limit the amount of nutrients your cows receive and ruin your pastures, meaning additional time and money to fix them.

Feeding Instructions

Please consult feed tag sewn onto bag for specific feeding directions.
