INSTRUCTIONS FOR FEEDING

SHOW PIG FINISHER W/PAYLEAN is a complete feed specifically formulated for pigs fed for exhibition. Feed continuously to finishing swine as the sole ration from 150 to 240 lbs body weight. Pigs must be fed in an ad libitum (full feed) feeding program.

CAUTION

Pigs fed Ractopamine HCl are at an increased risk for exhibiting the downer pig syndrome (also referred to as "slows", "subs", or "suspects"). Pig handling methods to reduce the incidence of downer pigs should be thoroughly evaluated prior to initiating use of Ractopamine HCl. Not for use in breeding swine. Do not use in any finished feed (supplement, concentrate or complete feed) containing in excess of 2% bentonite.

LIMITATIONS FOR USE: Feed continuously to finishing swine as sole ration for 21 days between 150 lbs and 240 lbs bodyweight. Ractopamine HCl should be fed in a complete swine ration containing at least 16% crude protein.
